Keeping you up-to-date!

Stiri - News

Dragi scafandri,

Pentru Aquarius anul 2009 a inceput cu unele modificari, noul site si newsletter. Prin aceste modificari incercam sa va informam in mod regulat. Daca doriti sa adaugati ceva in urmatoarele newsletter va rugam san e trimiteti prin e-mail ceia ce dorita sa adaugati iar noi o vom face!

Echipa Aquarius

Descoperirea submarinului SC...

In data de 15-11-08 scafandri de la Aquarius dive center au descoperit un submarine ce nu a mai fost vizitat niciodata de alti scafandri. Dupa prima scufundare la fata locului a fost clar ca este vorba despre un submarine rusesc din clasa SC (Scuka). Epava se gaseste pe un fund de 31 metri cu o inclinatie de 30 de grade pe partea starboard. In zona turnului se vad urmele impactului cu o mina sau cu o bomba anti-submarin. Este nevoie de mai multe scufundari pentru a identifica cauza exacta. Va vom tine la curent.

Pentru a participa la scufundarile organizate de catre Aquarius la acest submarin trebuie sa detinam un brever AWO, brevet Nitrox si sa aveti minim 10 scufundari la epave in conditii similare Marii Negre. Scufundarile vor fi facute numai cu Nitrox

Nitrox

La unele epave e bine ca scufundarile sa fie facute cu aer dar cele mai multe sunt perfecte pentru Nitrox. din acest motiv am introdus o nou sistem de imbuteliere pentru Nitrox. Pentru imbuteliere cu Nitrox sau cursul de specialitate Nitrox va asteptam la sediul nostru. [mai multe informatii](#)

Votati!

Pe site-ul nostru exista un sondaj de opinie referitor la limba in care doriti sa se deschida prima pagina a site-ului. Va rugam sa ne acordati putin timpul dumneavoastra si sa votati! [Poll](#)

Dear diver(s)

2009 started for Aquarius as a modification, site - newsletter. With this modifications we try to inform you on a better and regular base. If there is something what you like to add in one of our up-coming newsletters send a email and we do the job!

Aquarius team

SC... Submarine found

15-11-08 divers from Aquarius dive center found a submarine what was never visited by any other diver. After the first dive it's clear that we have to deal with a Russian submarine from the SC (Scuka) class. The wreck lay at a maximum depth of 31 meters and list a 30 degrees to starboard side. There is damage in the conning tower area what can be caused by a mine or depth charges. More dives are need for a positive identification. We keep you informed.

To dive with Aquarius on this submarine you need Advanced diver or equivalent with at least 10 wreck dives in similar Black Sea conditions. The dives will only be made with Nitrox and proper certification for that.

Nitrox

Some wrecks are pretty good to dive on air but most of them are better to dive with Nitrox. We support this thought and for this we changed last month our Nitrox filling system. We await you to fill your tank(s) with your desired percentage or enroll in our Enriched Air diver specialty course to get all the benefits from diving with Nitrox. [more info](#)

Site Poll

On our website we have a poll about the language what you prefer when you open the website ? It should be great if you will make some time and vote! [Poll](#)
